PROFESSIONAL PROFILE

Systems Engineer with experience developing digital platforms and technology-driven solutions for academic environments, digital marketing, and e-commerce. Skilled in backend development with Python (Django, Django REST Framework) and building REST APIs, with additional experience in Java Spring Boot. Proficient in relational databases, API integration, and modern frontend development with React, Angular, and Tailwind CSS. Experienced in translating business requirements into scalable technical solutions and currently strengthening cloud skills with AWS.

EDUCATION

B.Sc. in Systems Engineering — Graduated: December 2025
Universidad de Nariño, Pasto, Col

Technical Degree in Multimedia Design and Integration — Completed: November 2019
National Learning Service (SENA)

Bachelor's Thesis (Graduation Project) — *Honors: Meritorious (94/95)*
"Development of E-commerce Features and AI-Driven Digital Marketing Strategies for the Ecomindala Online Platform"

Diploma in Data Science — Completed: March 2026
Superior School of Public Administration (ESAP)

COMPLEMENTARY EDUCATION

Python Foundations I & II — Completed: August 2023
Cisco Networking Academy

Java Masterclass – From Zero to Expert — Completed: February 2026
Udemy

Angular University – From Zero to Expert — Next to Complete
Udemy

AWS Academy Cloud Foundations — Next to Complete
Amazon Web Services Academy

AWS Academy Cloud Developing — Next to Complete
Amazon Web Services Academy

PROFESSIONAL EXPERIENCE

Moritas de San Martín Women Entrepreneurs Association (Non-Profit Organization) — Web Developer
August 2022 – July 2024

- Designed and developed responsive landing pages and websites using React, Angular, JavaScript, HTML5, and CSS3, focused on strengthening the organization's digital presence.
- Implemented content management and update features, enabling non-technical users to manage information independently.
- Developed simple applications for data registration, upload, and storage using Django and Django REST Framework, adapted to operational needs.
- Built small backend services and API prototypes using Java and Spring Boot, supporting data management and integration requirements.
- Performed corrective and evolutionary maintenance, fixing bugs, improving stability, and delivering continuous platform enhancements.
- Optimized website structure and performance through resource loading improvements, component

organization, and frontend best practices.

- Supported digitalization initiatives and online visibility efforts, including product showcasing, informational content publishing, and basic support for digital marketing activities.

Mindala SAS (Commercial Company) — Web Developer August 2024 – October 2025

- Developed and enhanced a production-oriented e-commerce platform using Django REST Framework, React, and Tailwind CSS, delivering scalable APIs and responsive user experiences.
- Integrated AI-powered chatbot assistants using Google Gemini API to automate customer support and internal queries, improving operational efficiency and response workflows.
- Designed and implemented a business process categorization framework, strengthening commercial traceability and enabling structured, data-driven decision-making.
- Supported digital marketing strategy through campaign monitoring and performance analysis, contributing to a 35% increase in customer engagement during pilot deployments.
- Integrated inventory and warehouse workflows into the online store, improving logistics coordination and enabling real-time stock visibility.
- Contributed to the definition and implementation of data security and protection protocols, aligned with internal policies and industry best practices, ensuring system reliability and compliance readiness.

Psychology Program – University of Nariño — Lead Web Developer (Fullstack / Technical Owner)
November 2024 – December 2025

- Independently designed, developed, and delivered a full-stack institutional platform using Django REST Framework + React, managing the complete software lifecycle including requirements gathering, system architecture, database modeling, implementation, testing, deployment, and continuous improvement.
- Built a scalable academic and administrative system with Role-Based Access Control (RBAC), supporting multiple user profiles such as administrators, students, and institutional partners.
- Designed relational data models and optimized database performance using PostgreSQL, improving query efficiency, ensuring data integrity, and supporting reliable reporting workloads.
- Developed functional modules for surveys, psychological scales, factors, institutions, reporting, and analytics, enabling structured data collection and real-time decision-making.
- Implemented secure authentication and authorization mechanisms, including email-based login, permission groups, and protected API endpoints following backend security best practices.
- Applied clean architecture principles, maintainable REST API design, and systematic testing practices to ensure stability, scalability, and long-term maintainability in production environments.
- Collaborated with institutional stakeholders, providing technical guidance and deployment support to ensure adoption, usability, and operational continuity in real academic settings.

SKILLS

Backend Development (Python, Django, Django REST Framework, FastAPI) | Java Backend Development (Spring Boot) | API Design & Integration (REST, Swagger/OpenAPI) | Database Modeling & Performance Optimization (PostgreSQL, MongoDB) | Authentication & Authorization (JWT, RBAC) | System Architecture & Scalable Design | DevOps & Deployment Workflows (Docker, Linux, Nginx, Gunicorn) | Cloud Fundamentals (AWS: EC2, S3, IAM, Networking Basics) | CI/CD Fundamentals (GitHub Actions) | Software Quality & Testing Practices (Unit & Integration Testing) | Technical Documentation & Reporting | Agile Methodologies (Scrum/Kanban) | Troubleshooting & Production Support | Problem Solving & Continuous Improvement

TOOLS & TECHNOLOGIES

Python | Django | Django REST Framework (DRF) | FastAPI | Java | Spring Boot | PostgreSQL | MongoDB | Redis (Basic) | Node.js | NestJS | React (Basic) | Angular | TypeScript (Basic) | JavaScript | HTML5 | CSS3 | TailwindCSS | Git | GitHub | GitHub Actions | Docker | Nginx | Gunicorn | Linux | AWS (Basic: EC2, S3, IAM) | Render | Postman | Swagger / OpenAPI | REST APIs | JWT | Excel | SPSS | Notion | Trello | Bitrix24 | Scrum / Agile | OpenAI API | Google Gemini API | Adobe Photoshop | Adobe Illustrator | Adobe InDesign | Adobe XD

LANGUAGES

Spanish – Native
English – Advanced (C1)
French – Basic
